

FAA Registry Daily Digest — August 14, 2026

17 new registration(s), 3 dropped record(s), 20 ownership/status change(s), 0 new filing(s), 0 parts/engine/propeller filing(s).

Pending Transactions (Bills of Sale & Liens Filed Today)

*Filed with the registry today — often days ahead of the ownership record itself updating. Party names are withheld by the FAA under 49 U.S.C. § 44114(b), so this flags **which aircraft are in motion**, not yet who's buying.*

None today.

Parts, Engine & Propeller Market Activity

*Bills of sale, liens, and releases filed today against engines, propellers, or spare-parts lots — filed separately from the airframe record. The FAA doesn't store engine/propeller serial numbers in the aircraft file, so **these cannot be matched back to a specific N-Number** with the data available; shown as a raw feed of market activity rather than tied to a tail number. A part-out in progress often shows up here — an engine or prop changing hands — before or instead of anything appearing in the airframe record at all.*

None today.
